2026학년도 (공통영어2) 2학기 중간고사

과목코드	03	인쇄매수	290매	대상학년	1학년 1~8반	시험일	2026. 9. 28. [월]

※ [선택형 1~6] 다음 문장의 우리말 해석에 근거하여 빈칸에 들어갈 말로 가장 적절한 것을 고르시오. [각 0.9점]

1. They moved to the countryside for the _____ of their children's health.
[그들은 아이들의 건강을 위해 시골로 이사했다.]

① sake ② behalf ③ merit ④ motive ⑤ dignity

2. The captain accepted the trophy on _____ of the whole team.
[주장은 팀 전체를 대표하여 트로피를 받았다.]

① merit ② respect ③ behalf ④ sake ⑤ dignity

3. The vet _____ the illness within minutes of the bird's arrival.
[수의사는 그 새가 도착한 지 몇 분 만에 그 병을 진단했다.]

① modified ② violated ③ bred ④ diagnosed ⑤ tamed

4. The teacher asked us to _____ the smaller number from the larger one.
[선생님은 우리에게 큰 수에서 작은 수를 빼라고 하셨다.]

① suspend ② substitute ③ subtract
④ supplement ⑤ suppress

5. The paint will not _____ to a wet or dusty surface.
[페인트는 젖었거나 먼지 낀 표면에는 들러붙지 않는다.]

① conform ② contribute ③ contend
④ adhere ⑤ convert

6. The report laid the _____ for the accident on poor maintenance.
[그 보고서는 사고의 책임을 부실한 정비 탓으로 돌렸다.]

① blame ② pledge ③ symptom ④ illusion ⑤ anecdote

※ [선택형 7~11] 다음 문장의 빈칸에 들어갈 말로 문맥상 가장 적절한 것을 고르시오. [각 1.5점]

7. She stopped at the bank to _____ some cash for the trip.

① retreat ② transmit ③ reject ④ prevent ⑤ withdraw

8. The war was finally won, but at a terrible _____: thousands of soldiers never came home.

① bulletin ② diameter ③ cost ④ output ⑤ supplement

9. Each bear has its own _____ sleeping area inside the shelter.

① optimistic ② separate ③ jealous
④ bilingual ⑤ literate

10. When you touch something hot, a nerve _____ travels to your brain in a fraction of a second.

① motive ② instinct ③ incentive ④ velocity ⑤ impulse

11. Guitar strings must be kept at exactly the right _____ to stay in tune.

① anxiety ② tension ③ despair ④ panic ⑤ velocity

※ [선택형 12~13] 다음 문장의 밑줄 친 부분과 의미가 가장 유사한 것을 고르시오. [각 1점]

12. The rescue center made a <u>radical</u> change to the way it treats dehydrated birds.

① fundamental
② raw
③ shallow
④ characteristic
⑤ neutral

13. The sudden drop in donations <u>dismayed</u> the shelter staff.

① disguised
② discouraged
③ dispatched
④ discriminated
⑤ satisfied

※ [선택형 14~15] 다음 문장의 밑줄 친 부분과 의미가 정반대인 것을 고르시오. [각 1점]

14. The old principal was so <u>rigid</u> that he never allowed a single exception.

① flush ② loyal ③ flexible ④ humid ⑤ municipal

15. The treatment brought only a <u>partial</u> recovery, so the bird could not fly yet.

① particular ② mutual ③ supreme
④ dynamic ⑤ complete

뒷면에 계속

16. 다음 글의 밑줄 친 slip into the dark corners of the mind가 의미하는 바로 가장 적절한 것은? [3.3점]

Social media serves as an important context for autobiographical remembering. Personal events posted on social platforms are better remembered and less often forgotten than events that are never posted, regardless of the characteristics of the events themselves. This may be because sharing a memory online lets people rehearse it and make sense of what happened, which supports long-term retention. Online feedback such as comments and likes, together with technological features such as algorithms and periodic reminders, works as a further set of cues for the details of a posted event. Shared details are therefore stabilized and stay within reach, while the details we never put into words may slip into the dark corners of the mind.

① be replaced by the memories of other people
② be reshaped by the comments that friends leave
③ turn into stories that are retold more dramatically
④ become hard to recall because they were never rehearsed
⑤ remain private and therefore far more accurate

17. 다음 글의 요지로 가장 적절한 것은? [3.4점]

This morning, we had the opportunity to learn about animal treatment thanks to Molly, an elderly elephant. After spending 25 years carrying tourists along rough roads, she developed a twisted spine and foot pain. In order to support Jane in taking care of Molly's foot, we took part in positive reinforcement training, which involves using rewards to encourage desirable behaviors. When I gently touched her foot with a pole and called out, "foot," she lifted it. We then rewarded her with a sweet piece of watermelon, her favorite fruit. This training helps reduce the stress that animals experience during controlled situations, such as treatment or a health examination.

① Elephants should never be used to carry tourists on rough roads.
② Reward-based training lets an animal cooperate and lowers its stress.
③ Zoo keepers should be trained by professional veterinarians before they work.
④ Watermelon is the most effective reward for large animals in captivity.
⑤ Older animals need medical examinations far more often than younger ones.

18. 다음 글의 제목으로 가장 적절한 것은? [2.9점]

Humans are not the most social animal. Ants, bees, and termites put humanity to shame on many measures of sociality. A wide variety of relatives live together in perfectly harmonious order and collectively care for their young. But while insect colonies are impressively social places, theirs is not our kind of social life. Bees always build hexagonal hives, ants march in lines, and termites move in zigzag formations. These patterns recur predictably because they are tightly programmed genetically and propelled pheromonally. We humans are freer and far less tightly programmed, so every group dances a slightly different dance, and these choreographies change across generations. We still act in harmony with those around us, but through patterns shaped by nurture rather than by nature alone.

① Programmed Together: Why Human Society Copies the Hive
② Chemical Signals: The Hidden Language of Insect Colonies
③ Larger Brains, Larger Groups: The Arithmetic of Sociality
④ Born to Obey: How Genes Decide Every Human Custom
⑤ Less Programmed, More Varied: What Sets Human Groups Apart

19. 다음 글의 주제로 가장 적절한 것은? [2.8점]

What is the Capabilities Approach (CA), and why would lawyers passionate about animal justice care about it? It is easy to say what it is not. The CA does not rank animals by likeness to humans, nor does it seek special privileges for those judged most "like us." The CA has concern for the finch and the pig as much as for the whale and the elephant. It argues that the human form of life is simply irrelevant when we ask what each type of animal needs and deserves. What is relevant is their own forms of life. Just as humans seek the characteristic goods of a human life, so a finch seeks a finch's life and the whale a whale's life. We should extend ourselves and learn, rather than lazily picture animals as lesser humans seeking a life sort of like our own.

① why each species deserves the goods of its own life
② how lawyers have changed the legal status of large mammals
③ the reasons why intelligent species deserve stronger protection
④ the difficulty of measuring the emotions of wild animals
⑤ how zoos can imitate the natural habitats of rare species

20. 다음 글에서 전체 흐름과 관계 없는 문장은? [2.7점]

Every summer, city birds are found lying on pavements far from any shade. ① Heat drives their body temperature up faster than they can lose it, and the small pools they normally drink from dry out within hours. ② Rescue centres therefore place shallow water dishes along rooftops and park edges before the hottest weeks arrive. ③ Water covers about seventy percent of the Earth's surface, though only a tiny fraction of it is fresh enough to drink. ④ A bird that reaches such a dish in time usually recovers within a day. ⑤ Without these simple stations, however, the same streets fill with dehydrated birds year after year.

21. 다음 도표의 내용과 일치하지 않는 것은? [2.6점]

The graph above shows how residents of five cities reported injured birds in 2025. ① Phone calls were the most common method in all five cities. ② In Incheon, the mobile app accounted for nearly four out of ten reports. ③ Gwangju showed the highest share of phone calls and the lowest share of the mobile app. ④ Direct visits made up no more than 14 percent in every city. ⑤ In Seoul and Busan, phone calls accounted for more than half of the reports, and Seoul's share was higher than Busan's.

※ [선택형 22~23] 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것을 고르시오.

22.

Keep your paragraphs short. Writing is visual — it catches the eye before it has a chance to catch the brain. Short paragraphs put air around what you write and make it look ① inviting, whereas a long block of type can ② discourage a reader from even starting. Newspaper paragraphs should be only two or three sentences long, for newspaper type is set in a narrow column and the inches quickly add up. You may fear that such frequent paragraphing will damage the development of your point. Don't worry; the gains far ③ trail the hazards. But don't go too far, either. A succession of tiny paragraphs is as ④ annoying as a paragraph that runs on too long. Those verbless wonders written by modern journalists trying to make their articles quick and easy actually make the reader's job ⑤ harder by chopping a natural train of thought into pieces. [3점]

23.

Urban regeneration projects in degraded areas have recently been promoted as ways of improving residents' wellbeing and ① solving problems of environmental injustice. Yet such environmental improvements in ethnic communities and low-income households can create an urban green space paradox. New, high-quality green spaces raise the attractiveness of a district and make these neighbourhoods far more ② desirable. The cost of housing climbs along with that appeal, and long-term residents may no longer be able to ③ afford the rent. The result is the exclusion or displacement of the very residents who were intended to benefit from the ecosystem services that the new green space provides. In turn, those residents may only be able to afford a neighbourhood as ④ pristine as the one they left, with ⑤ little access to green infrastructure. [3.2점]

뒷면에 계속

※ [선택형 24~27] 다음 글의 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

24.

As children, the principle of opposites is foreign. Children perceive words and their meanings separately from each other, and it is only in later development that we grasp how individual words connect directly to one another. For many children, for instance, it is not clear that 'Right' is the opposite of 'Left'; they simply _____. A vivid example appears when children learn to ride a bicycle. If parents tell their child "Don't go to the left," they often find that the child keeps riding straight ahead and does not automatically turn to the right. [3점]

① repeat whichever word they have heard most often
② treat each word as a separate island of meaning
③ rely on gestures instead of words to reply
④ learn pairs of opposites faster than single words
⑤ copy the tone of voice rather than the instruction

25.

Human beings have evolved to make the most of the resources available to them in ways that are subtle and complicated. When we alter our diets, especially when we do so abruptly, we are in effect running vast experiments in nutrition. We ought to have more humility. Nutritional science is still young, and there is a great deal we do not know. If we have eaten certain foods in certain ways for millennia, we should _____, until it is proven otherwise. Traditional foods that do not fit neatly on the contemporary dietary plate should generally be chosen over highly processed ones that do. [3.1점]

① test every traditional recipe in a modern laboratory
② replace fatty foods with lean, factory-made products
③ trust the newest nutritional guidelines above all
④ change our eating habits as quickly as we can
⑤ assume that there is probably a good reason why

26.

The laws and constants of physics and the fundamental forces in our universe have very precise forms and values. This means that, if they were only very slightly different, life would not have been possible. The precise value of gravity, for instance, has enabled our universe to arise by permitting dust and gas particles to gather into proto-stars, around which planets later came to orbit, including the Earth around the Sun. If the value of the electron had been ever so slightly larger or smaller, chemistry as we know it would not have been possible, and life, which rests on organic chemistry, could not have started. The universe was not designed for us to evolve, and we hold no privileged position in it; nevertheless, the laws and constants of physics provided _____. [3.2점]

① the narrow conditions under which advanced life could arise
② the proof that our species was meant to appear
③ a model that chemists have since learned to redesign
④ the reason why gravity is stronger than other forces
⑤ an explanation of why the Earth orbits a single star

27.

The ancient Greeks felt that the visual artist's goal was to copy visual experience. This approach appears in the realism of ancient Greek sculpture and pottery. No paintings by ancient Greek artists survive today, so we can only surmise their quality from tales such as that of Zeuxis and Parrhasios, from the obvious skill of the sculpture, and from the drawings that remain on pottery. This definition of art as copying reality has a problem, though. Jackson Pollock, a leader of the New York School of the 1950s, deliberately did not copy existing objects in his art. While painting these works, Pollock and his fellow artists consciously avoided making marks or passages that resembled recognizable objects. They succeeded in making artwork that copied nothing, thus demonstrating that _____. [3.1점]

① realism demands far more technical skill than abstraction
② the Greeks valued pottery more highly than painting
③ an artist's intention matters less than the viewer's response
④ copying alone is not a sufficient definition of art
⑤ modern painters owe their techniques to ancient sculptors

※ [선택형 28~29] 다음 글을 읽고, 물음에 답하시오.

(A)

August 1, Thursday
On the last day, we ⓐwere called to the rescue center due to a sudden emergency.

(B)

After the treatment, the birds slowly began to recover. It was shocking that this type of accident happens every year, since the high temperatures ⓑ dry up water sources in the city. Caring for the birds, I couldn't help but ⓒreflecting on the impact of human activities on climate change and how it harms animals.

(C)

Some dehydrated birds had fallen out of the sky in the city and ⓓwas brought to the center.

(D)

Following the veterinarian's guidance, we provided water to the birds ⓔ while the vets treated their broken wings and legs and injected them with vitamins for a speedy recovery.
Saying goodbye to the animals and staff, I felt grateful for the opportunity to volunteer. I learned the importance of treating animals with respect and care, and came to realize that humans are just another kind of animal sharing the Earth with all other living creatures.

28. 주어진 글 (A)에 이어질 내용을 순서에 맞게 배열한 것으로 가장 적절한 것은? [2.8점]
① (B) - (D) - (C) ② (C) - (D) - (B) ③ (C) - (B) - (D)
④ (D) - (B) - (C) ⑤ (D) - (C) - (B)

29. 윗글의 내용과 일치하지 않는 것은? [2.5점]
① 봉사단은 마지막 날 갑작스러운 응급 상황으로 구조 센터에 불려 갔다.
② 탈수된 새들이 도시에서 하늘에서 떨어져 센터로 옮겨졌다.
③ 이런 사고는 도시의 높은 기온이 수원을 마르게 하기 때문에 매년 발생한다.
④ 글쓴이는 인간도 다른 생명체와 지구를 공유하는 또 하나의 동물임을 깨달았다.
⑤ 글쓴이는 새들에게 물을 주었고, 부러진 날개와 다리를 직접 치료해 주었다.

※ [선택형 30~31] 다음 글을 읽고, 물음에 답하시오.

Creativity is the ability (a)to generate novel and valuable ideas. It involves divergent thinking, imagination, and a willingness to experiment and take risks. While AI can be a powerful tool for creative efforts, it also carries the risk of limiting originality. AI algorithms trained on existing datasets often (b)identifies patterns and trends in past creations. While this is useful for generating content in familiar styles, it can also lead to derivative works that lack genuine originality. If artists and designers rely too heavily on AI for inspiration, they may find (c)themselves trapped in a cycle of imitation. Moreover, the ease with which AI generates content can discourage artists from (d)experiment with unfamiliar forms. The creative process is often messy and repetitive, involving numerous failures and setbacks. It is through these challenges that we refine our skills, develop our unique perspectives, and (e)push the boundaries of what is possible.

30. 윗글의 밑줄 친 부분 중, 어법상 틀린 것을 두 개 고르면? [3.6점]
① (a) ② (b) ③ (c) ④ (d) ⑤ (e)

31. 윗글의 내용을 바탕으로 다음 문장을 완성할 때, 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은? [2.9점]
Because AI hands us instant solutions, the trial and error that (A)_____ real skill is lost, and what looks like creation may in fact be (B)_____.

① builds — imitation
② builds — innovation
③ blocks — imitation
④ blocks — innovation
⑤ replaces — originality

【서답형 1.】 다음 우리말과 일치하도록 빈칸에 알맞은 단어를 첫 글자로 시작하여 쓰시오. (어형 변화 가능함 / 부분점수 없음) [각 1점, 총 4점]
1. Rescued animals f_____ once they are given space and proper care.
(구조된 동물들은 공간과 적절한 보살핌이 주어지면 번성한다.)
2. The sanctuary m_____ a record of every animal's health.
(그 보호소는 모든 동물의 건강 기록을 유지한다.)
3. Behaviours that help a species survive e_____ over thousands of years.
(어떤 종의 생존을 돕는 행동은 수천 년에 걸쳐 진화한다.)
4. A low fence marks the b_____ of the elephants' field.
(낮은 울타리가 코끼리 들판의 경계를 표시한다.)

뒷면에 계속

【서답형 2.】 <보기>의 단어를 모두 한 번씩 사용하여 빈칸을 채우시오. (필요하면 어형을 바꿀 것 / 부분점수 없음) [각 1점, 총 4점]

<보기>
anticipate · diverse · exclude · postpone

1. The staff _____ a busy weekend and prepared extra food in advance.
2. Heavy rain forced the club to _____ the second day of the trip.
3. A sanctuary keeps _____ species, from tiny birds to elephants.
4. Visitors under twelve are _____ from the feeding area for safety.

【서답형 3.】 위 [선택형 28~29] 글의 밑줄 친 ⓐ~ⓔ 중 어법상 틀린 것 2개를 찾아 기호를 쓰고, 바르게 고쳐 쓰시오. (기호 각 1점, 바르게 고친 것 각 2점) [총 6점]

기호	바르게 고친 표현

【서답형 4.】 다음 우리말과 같은 뜻이 되도록 <보기>의 단어를 모두 한 번씩 사용하여 문장을 완성하시오. (필요하면 어형을 바꿀 것 /「with + 목적어 + 과거분사」 구문을 사용할 것) [4점]

모든 장비가 꾸려진 채로, 우리는 자원봉사를 하러 출발했다.

<보기>
all · equipment · out · pack · set · the · to · volunteer · we · with

_____.

【서답형 5.】 다음 우리말과 같은 뜻이 되도록 <보기>의 단어를 모두 한 번씩 사용하여 문장을 완성하시오. (필요하면 어형을 바꿀 것 /「seem + to부정사」와「expect + 목적어 + to부정사」를 사용할 것) [5점]

좋은 소식은 Molly가 잘 적응하고 있는 것 같다는 것이고, 나는 그녀가 곧 나아지리라 기대한다.

<보기>
adapt · and · be · better · expect · get · I · Molly · seem · she · to · to · well

The good news is _____ soon.

【서답형 6.】 (A)를 읽고, (B)의 빈칸 ⓐ~ⓒ에 들어갈 말을 (A)에서 정확히 찾아 각각 한 단어의 영어로 쓰시오. (어형 변화 가능함) [각 2점, 총 6점]

(A) Kivetz, Urminsky, and Zheng partnered with a cafe to test the motivating effect of illusory progress. Customers received a reward card that offered one free coffee after they had bought ten. Half of them got a card with ten open slots, while the other half got a card with twelve open slots. The twelve-slot card, however, already carried two "bonus" stamps, so strictly speaking the two programs were identical: every customer still had to make ten coffee purchases to earn the free cup. Yet the appeal of the free stamps was strong. Customers who believed they had been given a head start came back to the cafe more often and filled their cards faster than the others. With two of twelve slots already stamped, it felt as though they were 16 percent of the way to the goal before they had even begun. Believing they were closer to the reward, they were more motivated to reach the finish line.

(B)

Q. Why did the twelve-slot card work better than the ten-slot card?

A. Both cards demanded ten coffee ⓐ_____, so the two programs were identical in substance. Yet the two free stamps made customers feel that they had already made some ⓑ _____ toward the goal, and the sense of being ⓒ _____ to the reward brought them back to the cafe more often.

【서답형 7.】 (A)를 읽고, (B)의 빈칸 ⓐ, ⓑ에 들어갈 말을 (A)에서 정확히 찾아 각각 한 단어의 영어로 쓰시오. (어형 변화 가능함) [각 3점, 총 6점]

(A) To harness the full potential of units of measurement, we need some degree of consistency. Subjective measures contain useful knowledge, but that knowledge is hard to share, based as it is on one person's experience. The historian of science Theodore M. Porter describes measurement as a 'technology of distance': a tool that uses shared rules to bridge differences of culture and geography. If measurement is another sort of language, then, just as with words, individual units need clear definitions in order to communicate. In the earliest societies these definitions might need to be shared no more widely than a single settlement, so a unit could simply be equal to a certain body part. As these communities grew, though, the inadequacies of such a system became evident, and a disagreement over trade or tribute demanded far greater consistency.

(B)

A unit works only when its definition is ⓐ_____ by everyone in the community. As settlements grew, arguments over trade exposed the ⓑ _____ of measures based on the human body.
